## Certificate

**Dr. Milorad Ljutica**, born October 9, 1971, from Belgrad, Serbia

completed a Clinical Fellowship (observership) from April 27 to May 29, 2015 on the Topics of Paediatric Ophthalmology, Strabismology, and Neuro-Ophthalmology at the Department of Ophthalmology of the UKGM, Giessen Campus.

***in the following fields:***

### **1- Operations:**

- Standard and advanced operations on the horizontal and vertical recti including revisions
- Different operations on the superior and inferior obliques including revisions
- Levator resections for congenital and acquired ptosis
- Different approaches for epibulbar dermoids
- Transpalpebral orbitotomy

**2- Strabismology and Pediatric ophthalmology:**

- Diagnosis, deciding the surgical plan, and follow up of patients with different strabismus entities, in particular complex motility disorders.
- Retinopathy of prematurity
- Imaging (digital wide field imaging with a RetCam III including fluorescein angiography, and hand-held spectral domain OCT)

**3- Hereditary Eye Diseases:**

- Diagnosis of retinal dystrophies including standard and advanced electrophysiology and psychophysics. Molecular genetics. Genetic counselling

**4- Neuro-Ophthalmology:**

- Diagnosis and follow up of patients with different neuro-ophthalmic disorders including electrophysiology and psychophysics.

**5- General ophthalmology clinic:**

- Examination, diagnosis, treatment, and follow up of different ophthalmic disorders.

Dr. Ljutica has profound knowledge in pediatric ophthalmology and strabismology.

His commitment was very much appreciated. Dr. Ljutica is an extremely pleasant person to work with, and discussions with him were very stimulating. We hope that his expectations were met during his stay in Gießen and wish him the very best for his further career.

Prof. Dr. med Birgit Lorenz, FEBO  
Professor of Pediatric Ophthalmology, Strabismus and Ophthalmic Genetics  
Chairman and Head of Department
